Order Execution Policy

Paytosave Limited (hereinafter-, Company”) has been engaged to establish a system to allow company to continue business operations consistently and seeks to provide best execution as required by the Markets when executing orders or quotes on behalf of clients.

Company has developed an Order Execution Policy, that defines the basic policy, system, procedures, and other matters in respect to Company’s approach to best execution, regardless of whether you are an elective professional client or a per se professional and it is not applicable to business conducted with eligible counterparties.

I. INTRODUCTION

1.1. Scope of policy

The Policy sets out our approach for carrying out exchange orders (hereinafter – “Orders”) from origination to execution, the venues we use and an explanation of how the different factors influence our execution approach, so that we can obtain the best possible result when executing your Orders. Unless separately defined in this document, words and expressions have the meanings given to them in our Customer Agreement or are used in a widespread trading practices.

The trading Assets carry a high degree of risk. They are not suitable for everyone. You should not trade with us unless you understand the nature of the transaction you are entering into and the extent of your potential loss from a trade. You must satisfy yourself that it is suitable for you in the light of your circumstances, financial resources and investment objectives. If you are in any doubt you should seek independent advice. You trade entirely at your own risk.

II. EXECUTION VENUES

We execute each Order you place with us by placing an order identical in all respects on to the Paytosave Limited or in another Liquidity Pool. Our general approach is to place your orders on the B2BX Exchange. Paytosave Limited provides exchange quality execution to both buy-side and sell-side trading members. We have selected Paytosave Limited as the primary execution venue.

III. LIQUIDITY POOLS

We may execute a Back to Back Order on other Liquidity Pools in order to facilitate fair and orderly trading when it is not possible to do so on the B2BX Exchange. We will only execute a Back to Back Order with a single liquidity provider who has provided consistent and reliable historic pricing. All trading will be executed on a firm liquidity basis with no last look.

IV. EXECUTION OF ORDERS

4.1. Execution of orders.

We execute each Order you place with us by placing an order identical in all respects (a Back to Back Order) on Paytosave Limited or another Liquidity Pool. We place Orders as principal and not as an agent on your behalf; we are the sole counterparty to your trades. When our Back to Back Order is matched, we will execute a trade on your Account at the same price and size.

4.2. Prices.

The prices on which you trade with us will be the prices available to us on the Paytosave Limited or another Liquidity Pool. Notwithstanding, the prices of such Back to Back Orders may differ from the prices that are displayed at the time that you place your Order to trade with us due to factors such as quantities on the order book, speed of execution and your choice of connectivity.

V. EXECUTION FACTORS

The execution factors which we take into account when we execute your Orders and their relative importance are as follows:

5.1.Price – highest importance:

The prices you receive are set by participants with the best Buy and Sell Orders determining the bid and ask prices. Our prices mirror those of the Paytosave Limited and may differ from those on other exchanges.

An Order placed with us for a specific size can result in a number of trades being executed on the Paytosave Limited (or a Liquidity Pool) to fill that Order in whole or in part. If that occurs, the prices you receive from us will depend on the liquidity on Paytosave Limited (or offered by Liquidity Pools) at the time that the corresponding part of our trade is executed and the prices may differ for each of the trades executed. In the case of Limit Orders the price you receive at execution will be the price in your instruction or better. In the case of Market Orders, Stop Market Orders the price you receive at execution will be the best price available at the time our Back to Back Order is executed in whole or part on the Paytosave Limited (or another Liquidity Pool). This could be better or worse than the price on Paytosave Limited (or a Liquidity Pool) at the time your Order is placed with us.

5.2.Speed, consistency and likelihood of execution – high importance:

You may place Orders with us on-line via the WebGUI or over the Software Trading Tools (API). We are under no obligation to accept an Order from you. However, we shall normally do so if you have sufficient funds in your Account with us, you are not otherwise in breach of the Terms of Business and it is possible to execute such Order. Factors such as the size of your Order and liquidity available in the Deliverable Digital Currency Contracts you wish to trade will impact whether and when it is possible to execute your Order.

The times at which you are able to submit Orders to us are might be restricted. Please see the Website for further details. It is important that you familiarize yourself with the restrictions on the submission of Orders before you commence trading with us, for these restrictions may affect your trading strategy.

We may be unable to execute all or part of your Order if there is insufficient liquidity in the Deliverable Digital Currency Contracts you wish to trade. If this occurs, the following will apply: In the case of Limit Orders, the remaining quantity will stay on the Order Book until canceled (Limit Orders is “Good ‘Til Canceled” or “GTC” orders on B2BX Exchange)

5.3.Limit Orders and Quantity available to trade – medium importance:

We have restrictions in place in terms of the minimum size of order you may hold in a Deliverable Digital Currency Contracts at any one time. Any opening Order you place with us will be subject to these restrictions. Our minimum order sizes are set by us for each Deliverable Digital Currency Contract and may vary depending on current market

conditions. Our minimum order sizes as they apply from time to time can be found in the Instrument Information on the Website. In addition, please note our ability to fill your Order is dependent on our ability to fill our Back to Back Order.

5.4. Cost – low importance:

We will levy a separate commission charge for each trade that is opened or closed on your Account. You do not incur an additional ‘spread’ charge with us as your trade is executed by us at the same price as we obtain from the Paytosave Limited (or a Liquidity Pool). You will pay the same commission whether we fill your order via Paytosave Limited or via another Liquidity Pool. As such, commission is not a factor for choosing whether to fill Orders using Paytosave Limited or another Liquidity Pool.

We shall wherever possible seek to comply with this Policy when we are required to exercise our judgment in obtaining the best outcome for the execution of your Orders.

VI. FINAL PROVISIONS

Customer Communications. We will notify you of any material changes to our order execution arrangements or this Policy in a durable medium or by updating our Website. By trading with us, you will be taken as having agreed to the contents of this Policy.
